Internship Profile

Job Title: Product Analyst Intern

Job Description: About the Company

Eightfold was founded with a vision to solve for employment in our society. For decades, the connection between individuals and opportunities has been based on who the individuals are and the strength of their network, vs. their potential. Eightfold leverages artificial intelligence to transform how to think about skills and capabilities for individuals as well as how jobs and career decisions are made. Eightfold offers the industry's first AI-powered Talent Intelligence Platform to transform how organizations plan, hire, develop and retain a diverse workforce, enabling individuals to transform their career.

Eightfold.ai is led by Ashutosh Garg, a PhD in Machine Learning/IIT Delhi alumni who managed Search and Personalization at Google, and Varun Kacholia-IIT Bombay alumni, who led the News Feed Ranking team at Facebook and developed YouTube Search at Google.

To date, Eightfold AI has received more than \$410 million in funding and a valuation of over \$2B from leading investors to further our mission of finding the right career for everyone in the world. If you are passionate about solving one of the most fundamental challenges of our society - employment, working on hard business problems and being part of an amazing growth story - Eightfold is the place to be!

About the Role

The Product Analyst will be responsible for analyzing product performance and customer feedback to provide actionable insights that drive product development and strategy. This role involves collaborating with cross-functional teams, including product management, marketing, and engineering, to enhance product offerings and improve customer satisfaction.

Primary Responsibilities

1. Data Analysis:

- Collect, analyse, and interpret data related to product performance, user behaviour and market trends.
- Use analytics tools to generate reports and dashboards that provide insights into product usage and customer feedback.

2. Support Product Development:

- Work closely with product managers to define product features & specs based on data-driven insights.
- Assist in creating user stories and acceptance criteria for product development.

3. Market Research:

- Conduct competitor analysis and market research to identify trends, opportunities, and potential threats to our products.
- Gather and document user feedback, requirements, and suggestions for product enhancements.

4. Collaboration:

- Collaborate with product, design and engineering teams to ensure alignment on product goals, features, and timelines.
- Participate in product testing and usability studies to gather feedback and identify areas for improvement.

5. Documentation:

- Maintain clear and comprehensive documentation of product requirements, analysis findings, and project updates to ensure effective communication across teams.

Qualifications

- Currently pursuing a Bachelors/Masters degree in Engineering in a Computer Science or related field and graduating in 2026.
- Available for a full-time summer internship for a minimum period of 2 months starting May '24
- Strong analytical skills and proficiency in data analysis tools (e.g., Excel, SQL, Python).
- Experience with data analysis and interpretation.
- Excellent communication and presentation skills.
- Ability to work collaboratively in a cross-functional team environment.
- Familiarity with product management processes and methodologies is a plus.

We are a team of self-starters who excel in their fields. We

believe in giving you responsibility, not a task. We want you to have ownership and pride in the work you are doing and see the positive impact of your work on your colleagues, our customers, and the world. We believe in providing transparency and support, so you can do the best work of your career.
