## Internship Profile

**Job Title:** Intern - Ultra Low Latency

**Job Description:** Graviton, a privately funded quantitative trading firm, is striving for brilliance in building cutting-edge trading systems and excellence in financial markets research. Team Facula at Graviton comprises some of the finest programmers in India, dedicated to working on cutting-edge technologies, primarily focused on designing and managing ultra-low latency trading systems capable of competing at a global scale. These systems operate at nanoseconds scale and handle millions of dollars' worth of trading transactions on a daily basis with unwavering robustness. After years of intentionally keeping a low profile, the team is now offering an opportunity to self-driven, innovative, and fearless minds at your campus

As a Software Engineer - Ultra Low Latency with Graviton your responsibilities will include:

Designing and implementing ultra low latency high-frequency trading systems

Building live reporting and administration tools for the trading systems

Scaling to new markets, optimizing and improving the overall latency of systems, through algorithm research and using cutting edge tools and techniques

End-to-end ownership of modules, including design,

development, deployment and support

Requirements : The ideal requirements for our candidates are:

Pursuing Bachelor's degree in Electronics/Computer Science Engineering from top IIT's

Skilled with Python, C/C++ and object-oriented programming

Basic Knowledge of Digital Logic Design

Introductory level skills in VHDL/Verilog would be a plus

Good knowledge of algorithms and data structures

Excellent problem solving skills

Knowledge of Linux systems

Strong communication skills and collaborative nature
