Internship Profile

Job Title: Quantitative Researcher Intern

Job Description:

AlphaGrep Securities seeks a Quantitative Researcher, who will be part of trading group which executes algorithmic strategies based on market behavior. We cover the global markets by leveraging and integrating technology, risk management and quantitative research. Being a proprietary trading business, we trade our own accounts and have no investors, clients or customers.

 Designing, implementing, and deploying high-frequency trading algorithms

 Exploring trading ideas by analyzing market data and market microstructure for patterns

 Creating tools to analyze data for patterns

 Contributing to libraries of analytical computations to support market data analysis and trading

 Developing, augmenting, and calibrating exchange simulators

QUALIFICATIONS:

AlphaGrep encourages bachelor's, and master's students in computer science, mathematics and related

fields to apply. Additional requirements include:

 Familiarity with machine learning (a plus)

 Experience with data analysis, market research and data modeling (a plus)

 Brilliant problem-solving abilities

 Software development experience as demonstrated through course work, research projects, or

open source activities, preferably in C++, Python or R/Matlab

 A passion for new technologies and ideas

 The ability to manage multiple tasks in a fast-paced environment

 Strong communication skills

	A working knowledge of Linux/Unix
