Internship Profile

Job Title:	Derivatives Analyst
Job Description:	Key Responsibilities: • Develop and implement alpha-generating strategies for options and derivatives. • Conduct thorough research and analysis of derivatives markets to identify trading opportunities. • Build and test quantitative models for options pricing, volatility forecasting, and risk management. • Collaborate with the broader quant team to integrate derivatives strategies into our multi asset portfolio. • Continuously monitor and refine models and strategies based on market conditions and performance metrics. • Utilize Python for data analysis, model building, and strategy backtesting. • Present research findings and strategy performance to the investment team. Qualifications: • Strong understanding of derivatives, particularly options, and experience in developing trading strategies. • Proficiency in quantitative analysis and financial modeling. • Experience with Python programming, especially in the context of financial data analysis and strategy backtesting. • Familiarity with options pricing models, volatility surfaces, and risk management techniques. • Ability to work independently and collaboratively within a

	fast-paced, team-oriented environment.
	• Excellent problem-solving skills and a passion for financial markets.
	Preferred Skills:
	• Knowledge of algorithmic trading and financial data science.
	• Experience with backtesting platforms and trading simulation tools.
	• Strong communication skills, with the ability to clearly articulate complex ideas and results.
