Internship Profile

Job Title: Quant Developer

Job Description:

Job Overview:

2Cents Capital is looking for a talented Quant Developer Intern to join our high-performing team. In this role, you will be responsible for developing and optimizing trading algorithms, implementing complex mathematical models, and ensuring the efficiency of our trading systems. As a Quant Developer, you will work closely with quants, traders, and other developers to deliver low-latency, high-performance trading solutions in a fast-paced financial environment.

Key Responsibilities:

Algorithm Development & Optimization:

- Develop and fine-tune trading algorithms and strategies to maximize performance in live trading environments.
- Ensure the adaptability and efficiency of algorithms across various market conditions.

Mathematical Model Implementation:

- Translate complex mathematical models and quantitative analysis into production-level code, ensuring accuracy and speed in real-time trading systems.

Technical Collaboration:

- Work closely with quants, traders, and other stakeholders to gather requirements, provide technical solutions, and support strategic trading initiatives.

System Performance & Reliability:

- Ensure the stability, performance, and reliability of trading systems through extensive testing, optimization, and ongoing maintenance.

Data Management:

- Manage large datasets and streaming data technologies, ensuring that the trading infrastructure can efficiently handle high-frequency data in real-time.

Architecture & Development:

- Contribute to the design and development of distributed systems, focusing on low-latency programming and scalable architecture to meet the demands of high-frequency trading.

Requirements:

Educational Background:

- Degree in Computer Science, Engineering, or a related field.

Programming Skills:

- Advanced proficiency in C++, Python, Java, or other relevant programming languages used in quantitative finance and trading environments.

Development Expertise:

- Experience in software development lifecycle management, version control systems (e.g., Git), and Agile development methodologies.

High-Frequency Trading (HFT):

- In-depth knowledge of high-frequency trading systems, low-latency programming, and real-time data processing.

Data Handling:

- Proficiency in working with large datasets, databases (SQL and NoSQL), and data warehouses for optimal data processing in trading systems.

Problem-Solving & Debugging:

- Strong analytical, problem-solving, and debugging skills to diagnose and resolve system issues in real-time trading environments.

Collaborative Communication:

- Effective communication skills for seamless collaboration with quants, traders, and cross-functional teams in a fast-paced, dynamic environment.

Preferred Qualifications:

- **Industry Experience:** Relevant experience in a financial institution, proprietary trading firm, hedge fund, or a similar setting.
- **Financial Instruments Knowledge:** Understanding of financial instruments, derivatives, and experience working with market data feeds.
- **Back-Testing & Simulations:** Experience with back-testing frameworks and simulation environments to evaluate and optimize trading strategies.
- **Cloud Computing Expertise:** Understanding of cloud computing services such as AWS, Azure, and experience integrating cloud-based solutions into trading systems.

Minimum No. of Hires: 5

Expected No. of Hires: 5

Location(s)/Place of Posting/Online: online

Skillset: • • Industry Experience: Relevant experience in a financial institution, proprietary trading firm, hedge fund, or a similar setting. • Financial Instruments Knowledge: Understanding of financial instruments, derivatives, and experience working with market data feeds. • Back-Testing & Simulations: Experience with back-testing frameworks and simulation environments to evaluate and optimize trading strategies. • Cloud Computing Expertise: Understanding of cloud computing services such as AWS, Azure, and experience integrating cloud-based solutions

Students with backlog eligible: No

Selection Process

Resume Shortlist: Yes

Mode of Selection: Virtual

Resume shortlisting before test?: No

Test: Yes

Mode of Test: Offline

Test duration (minutes): 120

Aptitude/Psycometric: No

Technical: Yes

Group Discussion: No

Personal Interview: Yes

Technical Round: Yes

HR Round: No

Other Processes (if any):

No. of Rounds: 2

Medical Test: No

Eligible Academic Programs

Diversity Recruiting: No

Eligible Years: Graduating in 2027 (Second Year Students) - B.Tech / Dual, Graduating in 2027 (Third Year Students) - Dual Degree, Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's

Eligible Departments: B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Chemical Engineering, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, M.Sc in Chemistry, M.Sc in Cognitive Science, M.Sc in Economics, M.Sc in Mathematics, M.Sc in Physics, Bachelor of Design, Master of Design in Industrial Design, Masters in

Stipend Details

Stipend (per month) (In INR Per Month): 40,000 INR Per Month

Provision of PPO based on performance? Yes

Tentative CTC for PPO select: 15,00,000 INR Per Annum

Medical Requirements

Medical Requirements: NO

Other Requirements

Other Requirements: NO
