Internship Profile

Job Title:	Data Science Intern-Pravritti'25
Job Description:	AI Prompt Engineering: ○ Collaborate with the team to design and develop effective prompts for AI models. ○ Experiment with different prompt strategies to enhance model performance and accuracy. ○ Analyze and iterate on prompt engineering techniques to optimize model outputs. ● LLM Training: ○ Assist in the training and fine-tuning of large language models. ○ Contribute to the development of training pipelines and workflows. Work on improving model efficiency, scalability, and resource utilization. ● Machine Learning: ○ Prioritization: Develop and implement algorithms for prioritizing tasks, data, or processes based on machine learning techniques. ○ NLP-Based Classification: Build models for natural language processing-based classification tasks, ensuring high accuracy and robustness. ○ Clustering: Utilize machine learning algorithms for data clustering to uncover patterns and relationships in large datasets. ● Collaboration and Communication: ○ Work closely with cross-functional teams to understand project requirements and objectives. ○ Communicate effectively with team members and

	present findings in a clear and concise manner. ○ Collaborate with other data scientists, engineers, and stakeholders to drive project success. ● Research and Innovation: ○ Stay updated on the latest advancements in AI and ML technologies. Contribute to the research and development of new methodologies to solve challenging problems.
