Nature of Business:	Other (core_engineering,data_science)
Other nature(s) of business:	Other (Product growth, startup)

Internship Profile

Job Title:	Software engineering interns
Job Description:	Aspiring BE/BTech computer science graduates of 2025 and 2026, here's your chance to work alongside the best minds in the industry! Auxia invites you to join our full-time internship program, where innovation meets excellence.

Auxia is a well-funded, seed stage startup. Our small team of primarily engineers has experience launching and scaling global products at Google, Meta, Lyft, etc. Our focus is in the B2B SaaS space and we have a bold vision to reimagine how digital companies drive growth.

Auxia's software engineers are generalist problem solvers who work across the software technology stack. Our engineers bring creative ideas in systems development, data management, machine learning, privacy and security, distributed computing, UI design, and more.

We Offer:

- World-Class Mentorship: Gain insights and learnings from ex-Google engineers and other industry experts.
- Impactful Projects: Work on real-world problems, honing your skills on projects that matter.
- A Vibrant Workplace: Thrive in our dynamic office space that's all about collaboration and creativity.

We're Looking For:

- Curious minds passionate about tech and looking to make a significant impact.
- Go-getters ready to dive into a world of innovative projects, without the need for specific technology expertise.

Jumpstart your career with an internship that promises growth, learning, and mentorship from the best in the business.
