Internship Profile

Job Title: Software Engineer Intern

Job Description:

Ready to be pushed beyond what you think you're capable of?

At Coinbase, our mission is to increase economic freedom in the world. It's a massive, ambitious opportunity that demands the best of us, every day, as we build the emerging onchain platform – and with it, the future global financial system.

To achieve our mission, we're seeking a very specific candidate. We want someone who is passionate about our mission and who believes in the power of crypto and blockchain technology to update the financial system. We want someone who is eager to leave their mark on the world, who relishes the pressure and privilege of working with high caliber colleagues, and who actively seeks feedback to keep leveling up. We want someone who will run towards, not away from, solving the company's hardest problems.

Our work culture is intense and isn't for everyone. But if you want to build the future alongside others who excel in their disciplines and expect the same from you, there's no better place to be.

This is a 12-week internship during summer 2025. Coinbase is seeking software engineer interns to join our

team to build out the next generation of crypto-forward products and features. You will solve unique, large scale, highly complex technical problems, bridging the constraints posed by web-scale applications and blockchain technology. You will help build the next generation of systems to make cryptocurrency accessible to everyone across the globe, operating real-time applications with high frequency, low latency updates, and managing the most secure, dockerized infrastructure running in the cloud.

What You'll Be Doing:

- Collaborate with engineers, designers, product managers, and senior leadership to shape and execute our technical roadmap each quarter.
- Write high-quality, well-tested code that meets customer needs.
- Tackle unique, large-scale, complex technical challenges.

Requirements:

- Experience in any object-oriented programming language (gained through coursework, personal projects, or work).
- Passion for building user-focused experiences.
- Self-motivated with a commitment to personal growth.
- Positive approach to problem-solving.

Preferred Qualifications:

- Currently pursuing a degree or certificate in Computer Science, Software Engineering, Computer Engineering, Mathematics, or a related field.
- Experience with Golang, MongoDB, AWS, Docker, Postgres, Ruby, or Rails.
- Experience developing mobile applications using React Native.

Minimum No. of Hires: -

Expected No. of Hires: -

Location(s)/Place of Posting/Online: Remote India

Skillset:

- Experience in any object-oriented programming language (gained through coursework, personal projects, or work).
- Passion for building user-focused experiences.
- Self-motivated with a commitment to personal growth.
- Positive approach to problem-solving.

Minimum CGPA: 7.00

Students with backlog eligible: No

Selection Process

Resume Shortlist: Yes

Mode of Selection: Virtual
