Location of Head office:	US
Nature of Business:	IT / Software

Internship Profile

Job Title:	Software (STEP) Internship
Job Description:	Google is invested in increasing future computer scientists and software developers, particularly those who are historically underrepresented in the field. Many aspiring computer scientists could benefit from a program that bridges the gap between academic study and a professional internship. Google aims to inspire these underrepresented students to continue in the field with such a program. With this in mind, Google is pleased to announce the 2025 STEP internship in India. It will be open to under-represented groups who will be in the second year of their university studies by the Summer of 2025 and are studying Computer Science or a related subject. This program includes three main components: a software project, skills based training, and professional development. This program is open to all qualified University students and is committed to addressing diversity in our company and in the technology industry. Students who are a member of a group that is historically underrepresented in the technology industry are encouraged to apply. This summer trainee program includes a development project that you will work on with a team of Googlers and other STEP Interns. You will enhance your coding skills, and gain exposure to tools and programming languages. You will attend ongoing technical talks by executive Googlers, match with a Google Engineer, to guide you through your summer experience, and engage in social activities, community building, and networking.

- Minimum qualifications
- Currently enrolled in a Bachelor's program, majoring or intending to major in Computer Science or related technical field.
 - Experience in one or more general purpose programming languages.
 - Ability to communicate in English fluently to actively participate in technical discussions.
- Preferred qualifications
- Currently enrolled in a full time degree program and returning to the program after the completion of the internship.
 - Ability to complete a full-time, 10-12 week internship between May and August 2025 (exact program dates will be provided at a later point in the process).
 - Excellent programming skills (e.g., C++, Java, Python).

Minimum No. of Hires:	1
Expected No. of Hires:	1
Location(s)/Place of Posting/Online:	Bangalore, Hyderabad, Pune, Gurgaon
