Internship Profile

Job Title:	Business Intelligence Analyst Intern
Job Description:	About the role • Nielsen measures the media-consumption habits of homes globally. Our data paints a rich portrait of the audience in those markets we measure. As a pioneer and industry leader in audience measurement for more than half a century, we take pride in our technology and processes, and we are constantly searching for new ways to advance our culture of innovation and growth. • The Business Intelligence Analyst Intern will develop analytics and platform solutions related to our cloud based Analytics Platform and supported business areas. • The ideal candidate is an analytics and cloud based systems enthusiast who likes to work on cutting-edge technologies in an environment that gives you the freedom to explore, play, and learn. We are seeking candidates who have curiosity, communication, and critical thinking skills to drive their work and thrive in a fast-paced environment and work well under pressure - essentially, they can focus, dig in, and get things done. Responsibilities • Learn about the analytics ecosystems, get hands-on experience with using various analytics and visualization applications and AWS-based services. • Analyze and optimize analytics workflows. • Participate in developing solutions for our cloud based infrastructure and systems to ensure platform reliability and efficiency

- Design data visualizations for both technical and non-technical end users to quickly understand key metrics and trends
 - Provide project status updates regarding key accomplishments, potential roadblocks, and deliverables
 - Develop and deliver presentation to senior management on relevant projects, topics
- Key Skills**
- Basic coding (Python, SQL) to manipulate and analyze data
 - Ability to work collaboratively across multiple teams
 - Willingness to learn and move fast
 - Ability to communicate clearly, concisely and effectively both verbally and in written communication
 - Summarize insights and present findings to technical and non-technical audiences
 - Currently pursuing a degree in Data Science, Statistics, Social Science (quantitative focus), or related field
 - Preferred: Data visualization experience, preferably via BI tools such as Tableau
 - Preferred: Intermediate coding skills for data analysis (Python and SQL preferred)
 - Preferred: Experience with Alteryx, Google suite, AWS services
 - Preferred: Knowledge and experience with SQL and no-SQL data database technologies

Minimum No. of Hires:	-
Expected No. of Hires:	3
Location(s)/Place of Posting/Online:	Bangalore, India (Hybrid Work)

Skillset:	Key Skills • Basic coding (Python, SQL) to manipulate and analyze data • Ability to work collaboratively across multiple teams • Willingness to learn and move fast • Ability to communicate clearly, concisely and effectively both verbally and in written communication • Summarize insights and present findings to technical and non-technical audiences • Currently pursuing a degree in Data Science, Statistics, Social Science (quantitative focus), or related field • Preferred: Data visualization experience, preferably via BI tools such as Tableau • Preferred: Intermediate coding skills for data analysis (Python and SQL preferred) • Preferred: Experience with Alteryx, Google suite, AWS services • Preferred: Knowledge and experience with SQL and no-SQL data database technologies
