Type of Organization:	MNC (Foreign Origin)
Location of Head office:	New York
Nature of Business:	Core Engineering & Technology

Internship Profile

Job Title:	Data Engineer Intern
Job Description:	About the Role ● Nielsen measures the media-consumption habits of homes globally. Our data paints a rich portrait of the audience in those markets we measure. As a pioneer and industry leader in audience measurement for more than half a century, we take pride in our technology and processes, and we are constantly searching for new ways to advance our culture of innovation and growth. ● The ideal candidate will have experience in Computer Science, Data Science, Analytics, Engineering, or related fields. Additionally, the candidate demonstrates a history of experience working within the Software Development Life Cycle, and exhibits excellent critical thinking, problem-solving, and interpersonal skills. ● Individual role details ○ Analytics team specific: This role drives the acceleration of data acquisition, ensures the reliability and accuracy of data outputs and enhances the accessibility and discovery of data. They offer technical guidance and mentorship, uphold data integrity and reusability, and collaborate with diverse teams to meet our extensive data needs. ○ Meters team specific: In this role, you will learn Nielsen's systems and TV/Radio panel data, with a focus on underlying meter hardware and infrastructure used for data

collection and ETL processing. You will develop and test software and related database infrastructure used to support both research and production pipelines, all while working within the Software Development Life Cycle framework and applying software development best practices.

Responsibilities

- Design and automate essential data pipelines and inputs, ensuring seamless integration with downstream analytics and production systems.
- Collaborate with cross-functional teams to integrate new functionalities into existing data pipelines, including lower test environments to help validate and assess impact prior to Production integration, where applicable.
- Implement data governance and quality processes to ensure the integrity and accuracy of data throughout its lifecycle.
- Monitor data systems and processes to identify issues and proactively implement improvements to prevent future problems.
- Participate in code reviews with senior developers prior to pushing the code into production to ensure meeting accuracy and best practice standards.
- Implement data pipeline Directed Acyclic Graphs (DAGs) and maintenance DAGs. Configure and set up DAGs based on the data to run Spark commands in parallel and sequential.
- Perform unit testing using test cases and fix any bugs.
- Optimize code to meet product SLAs
- Support multiple projects and communicate with stakeholders in various organizations. This includes regularly providing status updates, developing timelines, providing insights, etc.

Key Skills

- Active Student in a Bachelor's or Master's Degree (preferred) in Computer Science, Computer Engineering, Data Science, Analytics, Engineering, or related field
- Hands-on experience with the following:
 - Programming in Python, PySpark, and SQL
 - Big data technologies (Hadoop, Spark, Airflow)
 - Working within cloud-based infrastructures and tools (AWS, Azure, GCP)
 - Familiarity with version control (Git)
 - Working within the Software Development Life Cycle framework and applying software development best practices
 - Building monitoring checks and tools to ensure infrastructure and related processes are working as expected
- Understanding of system design, data structures and performance optimization techniques
- Problem solving skills and attention to detail
- Well-organized and able to handle and prioritize multiple assignments
- Able to communicate effectively both orally and in writing
- (Preferred) At least 1 year experience with visualization and reporting tools, e.g. Tableau, PowerBI

	• (Preferred) Experience deploying and maintaining Machine Learning models within Production environments • (Preferred) Experience working with Jira, Confluence, and Smartsheets • (Preferred) Experience with Alteryx, Databricks platforms What You Will Get • Hands on experience with cutting edge technologies • Experience with real-world data challenges and solutions • Opportunity to contribute to impactful projects that are frontline of the Media space • Mentorship from well-versed data Engineers
Minimum No. of Hires:	-
Expected No. of Hires:	1
Location(s)/Place of Posting/Online:	Bangalore, India (Hybrid Work)
Skillset:	Key Skills • Active Student in a Bachelor's or Master's Degree (preferred) in Computer Science, Computer Engineering, Data Science, Analytics, Engineering, or related field • Hands-on experience with the following: ◦ Programming in Python, PySpark, and SQL ◦ Big data technologies (Hadoop, Spark, Airflow) ◦ Working within cloud-based infrastructures and tools (AWS, Azure, GCP) ◦ Familiarity with version control (Git) ◦ Working within the Software Development Life Cycle framework and applying software development best practices ◦ Building monitoring checks and tools to ensure infrastructure and related processes are working as expected • Understanding of system design, data structures and performance optimization techniques • Problem solving skills and attention to detail • Well-organized and able to handle and prioritize multiple assignments • Able to communicate effectively both orally and in writing • (Preferred) At least 1 year experience with visualization and reporting tools, e.g. Tableau, PowerBI • (Preferred) Experience deploying and maintaining Machine Learning models within Production environments • (Preferred) Experience working with Jira, Confluence, and Smartsheets • (Preferred) Experience with Alteryx, Databricks platforms What You Will Get • Hands on experience with cutting edge technologies • Experience with real-world data challenges and solutions • Opportunity to contribute to impactful projects that are frontline of the Media space • Mentorship from well-versed data Engineers
Minimum CGPA:	6
Students with backlog eligible:	No

Selection Process

Resume Shortlist:	Yes
--------------------------	-----

Mode of Selection:	Hybrid
Resume shortlisting before test?:	No
Test:	Yes
Mode of Test:	Offline
Test duration (minutes):	90
Aptitude/Psycometric:	No
Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes
Technical Round:	Yes
HR Round:	No
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	70,000 INR Per Month
Accommodation:	--
Any other perks/ benefits/ components:	--
Provision of PPO based on	Yes

performance?

Tentative CTC for PPO select: TBD INR Per Annum
