Type of Organization:	Private
Nature of Business:	Other (core_engineering,it_software)

Internship Profile

Job Title: Computer Vision Intern

Job Description: Position Overview:

As a Computer Vision Engineer at Hurrey, you will be at the forefront of pioneering projects that leverage cutting-edge technologies to reshape the future. You will play a vital role in developing and deploying innovative solutions in image and video processing, utilizing tools such as YOLO, OpenCV, PyTorch, Transformers, and more. Your expertise will drive the development of advanced computer vision algorithms and applications, contributing to the creation of groundbreaking products that redefine industry standards.

Responsibilities:

Develop and implement computer vision algorithms and models for image and video processing tasks.

Research and Validate product requirements from research papers and convert it into executable code

Prepare custom dataset for fine tuning models as and when required.

Utilize YOLO, OpenCV, PyTorch, Transformers, and other relevant tools and frameworks to build robust and scalable solutions.

Collaborate with cross-functional teams to understand project requirements and translate them into technical specifications.

Conduct research to stay updated on the latest advancements in computer vision and machine learning.

Optimize algorithms for performance and efficiency, ensuring seamless deployment in real-world scenarios.

Design and conduct experiments to evaluate the

	Design and conduct experiments to evaluate the effectiveness of developed solutions and iterate based on feedback. Participate in code reviews, contribute to documentation, and provide technical guidance to team members.
Minimum No. of Hires:	2
Expected No. of Hires:	2
Location(s)/Place of Posting/Online:	Bengaluru
Skillset:	Expertise in language modeling, Experience with deep learning, Knowledge of Recurrent Neural Networks (RNNs), Experience with Convolutional Neural Networks (CNNs), Familiarity with AI modeling, Proficiency in data structures and algorithms (DSA), Ability to develop and optimize code for machine learning experiments, Collaboration with cross-functional teams, Ability to prepare and present technical findings, Skills in training and fine-tuning models for optimal performance, Experience in benchmarking and evaluating machine learning models, Participation in code reviews and providing feedback, Staying updated with advancements in AI and machine learning technologies
Project Details:	We harness AI for enhanced information comprehension, bridging gaps between data and its meaning. Our mission is to revolutionise knowledge utilisation for individuals and businesses.
Students with backlog eligible:	No

Selection Process

Resume Shortlist:	Yes
Mode of Selection:	Virtual
Resume shortlisting before test?:	No
Test:	No
Group Discussion:	No
Personal Interview:	No
Technical Round:	Yes
HR Round:	Yes
Other Processes (if any):	Assignment Round
No. of Rounds:	3
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Computer Science & Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	30,000 INR Per Month
