Internship Profile

Job Title:	Electronics Intern
Job Description:	1. Hardware Design and Development: Collaborate with senior engineers to design and develop electronic circuits and systems for medical devices, incorporating the latest advancements in technology. 2. Prototyping: Participate in the prototyping and testing of new electronic designs, ensuring their functionality, reliability, and safety. 3. Component Selection: Assist in selecting electronic components based on performance, cost, and reliability considerations, while staying up-to-date with emerging components in the market. 4. PCB Layout: Contribute to the design and layout of printed circuit boards (PCBs), optimizing for performance, manufacturability, and miniaturization. 5. Embedded Systems: Gain hands-on experience in programming and debugging embedded systems, microcontrollers, and FPGAs, enhancing your skills in real-time applications. 6. Testing and Validation: Assist in testing and validating electronic systems using appropriate tools and techniques, ensuring compliance with industry standards and regulations. 7. Documentation: Create clear and concise technical documentation for designs, test procedures, and results, supporting the knowledge-sharing within the team. 8. Collaboration: Collaborate cross-functionally with other engineering disciplines, such as software and mechanical engineering, to ensure seamless integration of electronic components. 9. Innovation and Research: Stay updated on the latest trends and breakthroughs in electronics and medical device technology, suggesting innovative ideas for product enhancement.

10.Problem Solving: Contribute to troubleshooting and resolving technical challenges in collaboration with the engineering team.
