

Internship Notification Form, IIT Delhi

About Organisation

Name of Company:	National Payments Corporation Of India
Date of Establishment:	2008-12-01
Number of Employees:	1800
Social Media Page Link:	https://www.npci.org.in
Website:	https://www.npci.org.in
Type of Organization:	Private
Nature of Business:	-
Other nature(s) of business:	Other (Fintech)

Internship Profile

Job Title:	Interns
Job Description:	JOB DESCRIPTION What will you be Doing? We are in process building of India's Blockchain Infrastructure to cater to India's financial institutions. During your internship, you will be working with world class system designers, domain specialists, developers to solve core engineering problems in the area of Blockchain, Distributed Systems, DevOps/Cloud that impact the financial services ecosystem of the nation. As an intern/employee in the Innovation/Blockchain team, you get an opportunity to work in the following capacity: • As an engineer, building core Blockchain components and decentralised applications • Designing technical components with functional and non-functional requirements • Solving core engineering challenges around scalability, optimising throughput and low latency of distributed systems, databases with data replication and consistency for population scale It would be desirable if you are: • Equally comfortable working in teams and as an individual contributor • Knowledge of one of the following programming languages: GoLang / Typescript / Angular JS / Nodejs / Rust • Knowledge in Distributed Systems, NoSQL Databases, DevOps/Cloud What can you expect?

You will be part of the Market Innovation group and get exposure working with a high performance team on productionized blockchain platform designed to be consumed at national scale

JOB DESCRIPTION

Any IT Analyst who joins NPCI gets to work on projects and platforms that impact the payments and financial services ecosystem of the nation.

As a recruit in the AI team, you shall be working in one of the following capacities:

o Data Engineer

You would be responsible for:

- Interacting with cross-functional teams to foster a data driven payments organization

- Creation of data pipeline for models which include data preparation, data cleaning,

- transformations using open-source tools such as DBT, Feast, Kubeflow, Mlflow etc

- Working on big data systems such as Hive, Trino and spark for feature generation

- and data processing

- Development of data streaming applications and REST services for model serving in

Production

- Compilation of complex predictive model packages for production deployment,

- support model installations, and monitor and calibrate production models

- Performing analysis on various data sources and generate reports and deeper

- insights at the aggregate level, as well as at the model level. Interpret and present

- these results to a non-technical audience

- Kafka, Spark, Scala and Flink skill sets for streaming jobs

o Data Scientist

You would be responsible for:

- Working on exploratory data analysis such as fraud prediction

- Finding opportunities to create and automate repeatable analyses or build self-service tools for business users

- Building traditional machine learning models and deep learning models - which

- would work on tabular data, images, voice, and text – all of which are related to use

- cases in the payment's domain

- Designing experiments, test hypotheses, and build, train and deploy various models

- utilizing the traditional datasets and graph data

- Scripting in Python and SQL.

o ML Ops Engineer

You would be responsible for:

- Creation of ML models for data pipelines and engineering infrastructure to support

- the machine learning systems at scale

- Building docker images of the machine learning models and deploy them onto

- production systems

- Development and deploying of scalable tools and

services to satisfy the needs of the team

- Identification and evaluation of new technologies to improve performance, maintainability, and reliability of the ML systems
- Development of CI/CD pipelines and enable automation using ArgoCD, Jenkins, etc
- Maintenance of versioning of the artifacts deployed on the systems using Git
- Deployment and configuration of tools on Kubernetes along with administration of it
- Deployment & maintenance of the BigData storage (Ceph,etc..) and their interfaces like Rook & S3.

• Exposing models as services

• Exposure/ skills on Redis, Gunicorn, Ngnix, Kafka, Druid, MinIO and Trino etc

o Insight Analyst

You would be responsible for:

• Working with the Analytics leads to define clear business requirements for data analysis projects

• Extracting, cleaning and preparing data for analysis using PL/SQL, Python

• Performing exploratory data analysis (EDA)

• Interpreting data, formulating hypotheses and developing an analytical approach to generate data driven insights

• Presenting insights in a concise and consumable form including business impact and key visualizations

• Developing reports and dashboards using Superset or any visualization tool

• Create >= 4 snippets covering data insights a month

• Work on data insights using statistical methods like hypotheses testing, regression, classification, forecasting

o Statistics

You would be responsible for

• Development of Supervised and Un-supervised Learning methods/algorithms from

all genres viz. Statistical (e.g. Logistic, Discriminant, K-means etc), Machine

Learning (e.g. Random Forest, SVM etc), or Deep Learning (e.g. NN, CNN etc)

• Scripting in Python and SQL skills – have the flair to pick-up any

language/technology/tool in quick time

• Solving business problems with data

• Good storytelling, articulation and documentation.

• Taking the ownership and figure out things proactively.

• Should have knowledge in Statistics, Quantitative Economics, Operations Research

(OR), Bayesian Modelling or any similar fields

Minimum No. of Hires:

-

Expected No. of Hires:

-

Location(s)/Place of Posting/Online:	Chennai / Hyderabad / Mumbai
Skillset:	Knowledge of one of the following programming languages: GoLang / Typescript / Angular JS / Nodejs / Rust • Knowledge in Distributed Systems, NoSQL Databases, DevOps/Cloud /Python / SQL
Minimum CGPA:	10th/ SSC - 60 % and above (First Class) Diploma / 12th / HSC - 60 % and above (First Class) BE/BTECH - 60 % and above (Till current Sem)(First Class) No live backlog Only BE/BTECH can apply No Dual Degree / ME / MTECH applications accepted. Only 1-year gap between 12th & BE/BTECH Note : The Job Description is for reference purpose only . Candidates will be aligned role as found suitable for the either roles and should be flexible for any roles which will be assigned by the organization.
Students with backlog eligible:	No

Selection Process

Resume Shortlist:	Yes
Mode of Selection:	Virtual
Resume shortlisting before test?:	No
Test:	Yes
Mode of Test:	Online
Test duration (minutes):	120
Aptitude/Psycometric:	Yes
Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes
Technical Round:	Yes
HR Round:	Yes
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
------------------------------	----

Eligible Years:	Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Materials Engineering, B.Tech in Mechanical Engineering

Stipend Details

Stipend (per month) (In INR Per Month): 40,000 INR Per Month

Accommodation: NO

Any other perks/ benefits/ components: NO

Other Requirements

Other Requirements: Stipend per month INR 40,000/- is subject to TDS deduction

Criteria :

10th/ SSC - 60 % and above (First Class)

Diploma / 12th / HSC - 60 % and above (First Class)

BE/BTECH - 60 % and above (Till current Sem)(First Class)

No live backlog

Only BE/BTECH can apply

No Dual Degree / ME / MTECH applications accepted.

Only 1-year gap between 12th & BE/BTECH

Note : The Job Description is for reference purpose only .
Candidates will be aligned role as found suitable for the either roles and should be flexible for any roles which will be assigned by the organization.
