Internship Profile

Job Title: Pravritti'25-Software Development Engineering

Job Description:

We are seeking a highly skilled and motivated Software Developer to design, develop, and implement a Structural Health Monitoring (SHM) System for Sanrachna Prahari. The role requires expertise in software development, real-time data processing (AI/ML enabled), and IoT-based solutions to enhance infrastructure monitoring. Candidate will be performing tasks like developing and maintaining the software framework for the Structural Health Monitoring System as part of data centre management. Designing and implementing algorithms for data collection, processing, and analysis from various sensors. Integrating IoT-based sensors and devices for real-time monitoring of structural health. Developing a cloud-based/web-based dashboard for visualization, alerts, and reporting. Ensuring scalability, security, and robustness of the SHM system. Collaborating with civil engineers, data scientists, and hardware engineers to optimise monitoring capabilities. Implementing artificial intelligence and machine learning models (AI/ML) for predictive maintenance and anomaly detection. Conduct system testing, debugging, and performance optimisation. Maintain proper documentation, version control, and software lifecycle management.

Minimum No. of Hires: 2

Expected No. of Hires: 2

Location(s)/Place of Posting/Online: Research and Innovation Park, IIT Delhi Campus

Skillset:

- Bachelor's/Master's degree in Computer Science, Software Engineering, or any other engineering branch

preferably Civil Engineering. • Proficiency in Python, Java, C++, or other relevant programming languages. • Experience in IoT-based system development and working with sensor networks. • Familiarity with real-time data acquisition and processing frameworks. • Knowledge of databases (SQL, NoSQL) and cloud platforms like AWS, Azure, or Google Cloud. • Experience with web development (React, Angular, or Vue.js) and REST APIs. • Strong background in data analytics, AI/ML algorithms, and predictive modeling. • Understanding of structural engineering concepts and SHM principles (preferred). • Ability to work in cross-functional teams and manage project timelines effectively.
