Type of Organization:	STARTUP
Nature of Business:	Core Engineering & Technology

Internship Profile

Job Title: Deep Learning Engineer

Job Description: SmartTrak AI is seeking a skilled Deep Learning Engineer to join our cutting-edge team, driving innovation in AI solutions for industrial and energy applications. As a key member, you will design, implement, and optimize state-of-the-art deep learning models tailored to real-time digital twins, fault detection, energy forecasting, and ROI predictions. Your responsibilities will include developing scalable models for satellite imagery analysis, predictive maintenance, and energy systems optimization. You'll leverage frameworks like TensorFlow and PyTorch, implement mixed precision training, and optimize performance on high-capacity GPUs. Collaborate with cross-functional teams to deliver robust solutions integrated with IoT, SCADA, and Digital Twins platforms. We're looking for candidates with a strong foundation in deep learning, Python programming, computer vision, and time-series analysis. If you thrive in a dynamic environment and want to contribute to impactful AI innovations transforming the energy sector, SmartTrak AI is the place for you!

Key Responsibilities:

Create and implement state-of-the-art deep learning architectures for applications such as real-time digital twins, fault detection, energy forecasting, and ROI predictions.

Enhance model efficiency using frameworks like TensorFlow and PyTorch, apply mixed precision training, and optimize performance on high-capacity GPUs.

Build scalable deep learning models for satellite imagery analysis, predictive maintenance, and energy systems optimization to handle large datasets and real-time

optimization to handle large datasets and real-time processing.
 Work alongside IoT and SCADA platform teams to integrate robust AI solutions, ensuring seamless deployment and functionality within existing industrial and energy systems.
 Stay updated with the latest deep learning techniques and industry trends to drive continuous innovation, contributing to impactful AI solutions that transform the energy sector
 Qualifications:

Bachelor's or Master's degree in Computer Science, Electrical Engineering, Data Science, or a related field with a strong foundation in deep learning and machine learning principles.
 Extensive experience with Python and frameworks such as TensorFlow and PyTorch, enabling the design, implementation, and optimization of advanced neural network models.
 Strong knowledge in computer vision, time-series analysis, and high-performance computing, including GPU optimization and mixed precision training to handle large-scale data and real-time processing.
 Proven ability to work effectively within cross-functional teams, integrating AI solutions with IoT and SCADA platforms, and ensuring seamless deployment in industrial and energy systems
 Benefits:

Opportunities for continuous learning and career advancement within a rapidly expanding company.
 Work on cutting-edge AI-driven projects that make a tangible impact on energy efficiency and industrial performance.
 Join a team of passionate professionals dedicated to innovation and excellence.
 Network with key stakeholders and industry experts

Minimum No. of Hires:	1
Expected No. of Hires:	3
Location(s)/Place of Posting/Online:	Remote
Skillset:	Deep Learning Expertise, Python Programming, TensorFlow & PyTorch, Computer Vision & Time-Series Analysis, High-Performance Computing, Up-to-Date with AI Trends, GPU Optimization
Students with backlog eligible:	No

Selection Process

Resume Shortlist:	Yes
Mode of Selection:	Virtual
Resume shortlisting before test?:	Yes

Test:	Yes
Mode of Test:	Online
Test duration (minutes):	60
Aptitude/Psycometric:	No
Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes
Technical Round:	Yes
HR Round:	No
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2027 (Second Year Students) - B.Tech / Dual, Graduating in 2027 (Third Year Students) - Dual Degree, Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Chemical Engineering, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, B.Tech and M.S.(R) in Electrical Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	35,000 INR Per Month
--	----------------------

Medical Requirements

Medical Requirements:

NA

Other Requirements

Other Requirements:

participation in extracurriculars in the related fields such as hackathons, clubs, societies, events, and Olympiads. and exceptional enthusiastic engagement and leadership demonstrable in the interview is an additional plus point we are looking forward to.
