Type of Organization:	STARTUP
Nature of Business:	Core Engineering & Technology

Internship Profile

Job Title:	Electrical & Embedded System Design Engineer
Job Description:	We are seeking dynamic and motivated Embedded system design engineer to join our Software and hardware development team. In this role, you will collaborate with senior leadership to identify and pursue new areas of research, design the hardware solutions that finally make it to the market as the products of company. This role offers an excellent opportunity to gain hands-on experience in a fast-paced, high-growth startup environment. Key responsibilities - Designing the hardware that goes onsite a solar power plants like – Tracker, Inverter and MFM modules Optimizing the components for maximum efficiency and form factor & be able to participate in software modelling of the embedded components Sensor Integration and Data Acquisition, Edge Computing Develop and optimize firmware for microcontrollers and embedded processors to ensure reliable data acquisition, processing, and communication with AI algorithms Conduct rigorous testing, including hardware in the loop simulations, to verify systems reliability and compliance Qualifications - Bachelor's degree in mechanical engineering, Structural Engineering, or a related field. A master's degree is a plus. Basic understanding of machine learning algorithms and their integration into embedded systems Knowledge of circuit design, component selection, and hardware debugging Experience with firmware development for microcontrollers and embedded processors

	Strong interest in renewable energy, AI technologies, or digital transformation. Ability to work both independently and collaboratively in a fast-paced environment
Minimum No. of Hires:	1
Expected No. of Hires:	3
Location(s)/Place of Posting/Online:	Remote
Skillset:	To excel in this role, the candidate should possess a bachelor's degree in Mechanical Engineering, Structural Engineering, or a related field, with a master's degree being a plus. Key skills include proficiency in circuit design, component selection, hardware debugging, and firmware development for microcontrollers and embedded processors. A foundational understanding of machine learning algorithms and their integration into embedded systems is essential. Experience in designing hardware for solar power plants—such as trackers, inverters, and MFM modules—and optimizing components for maximum efficiency and minimal form factor is required. The candidate should be adept in sensor integration, data acquisition, edge computing, and participating in software modeling of embedded components. They must be capable of developing and optimizing firmware to ensure reliable data acquisition, processing, and communication with AI algorithms, as well as conducting rigorous testing, including hardware-in-the-loop simulations, to verify system reliability and compliance. A strong interest in renewable energy, AI technologies, and the ability to work both independently and collaboratively in a fast-paced environment are crucial.
Students with backlog eligible:	No

Selection Process

Resume Shortlist:	Yes
Mode of Selection:	Virtual
Resume shortlisting before test?:	Yes
Test:	Yes
Mode of Test:	Online
Test duration (minutes):	60
Aptitude/Psycometric:	No
Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes

Technical Round:	Yes
HR Round:	No
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2027 (Third Year Students) - Dual Degree, Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Chemical Engineering, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, B.Tech and M.S.(R) in Electrical Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	35,000 INR Per Month
Provision of PPO based on performance?	Yes
Tentative CTC for PPO select:	1,200,000 INR Per Annum

Medical Requirements

Medical Requirements:	NA
------------------------------	----

Other Requirements

Other Requirements:	participation in extracurriculars in the related fields such as
----------------------------	---

hackathons, clubs, societies, events, and Olympiads. and exceptional enthusiastic engagement and leadership demonstrable in the interview is an additional plus point we are looking forward to.
