Type of Organization:	STARTUP
Nature of Business:	Core Engineering & Technology

Internship Profile

Job Title: Multi-Agent System Intern

Job Description: We are seeking a motivated and talented intern to assist in designing and developing agentic systems and workflows powered by AI. The candidate will work closely with our team to build intelligent agents that integrate seamlessly with advanced AI models, including Large Language Models (LLMs), ScienceNet, Diffusion models, and other tools.

This is a unique opportunity to gain hands-on experience in developing innovative AI solutions while contributing to the core architecture of future-proof systems.

Key Responsibilities -

Assist in designing and implementing autonomous agent workflows tailored for industrial applications.

Develop and integrate AI agents with LLMs, knowledge graphs, and APIs for enhanced functionality.

Collaborate on creating Retrieval-Augmented Generation (RAG) workflows.

Implement tools and connectors to integrate diverse data sources for agentic systems.

Explore and prototype solutions utilizing AI agents for the tasks such as energy forecasting, fault prediction, and natural language-driven analytics

Conduct testing and debugging of agent systems to ensure seamless operations and reliability.

Document development processes, workflows, and findings to aid in scalability and further research

Qualifications -

Must-Have:

Currently pursuing or recently completed a degree in Computer Science, Data Science, AI, or related fields.
 Strong programming skills in Python and familiarity with frameworks like TensorFlow or PyTorch.
 Basic understanding of AI/ML concepts, including Large Language Models (LLMs) and Natural Language Processing (NLP).
 Knowledge of APIs and tools for data integration and workflow automation.
 Strong problem-solving skills and attention to detail.
 Preferred:

Experience with agent frameworks like LangChain or DSPY (Declarative Programming Systems).
 Familiarity with tools for knowledge retrieval, such as vector databases (e.g., Pinecone, Weaviate).
 Knowledge of Reinforcement Learning (RL) or other agentic methodologies.
 Prior experience with AI-driven automation workflows.
 Benefits -

Hands-on exposure to the latest technologies in AI and Digital Twin systems.
 Mentorship from industry experts in AI, energy forecasting, and automation.
 Opportunities to work on impactful projects with real-world applications.
 A dynamic, fast-paced startup environment fostering innovation and growth.

Minimum No. of Hires: 1

Expected No. of Hires: 3

Location(s)/Place of Posting/Online: Remote

Skillset: Proficiency in designing and testing AI-based Energy Management Systems for solar energy, Experience with power system simulations and modeling dynamic grid scenarios, Knowledge of Battery Energy Storage Systems and their integration into the grid, Understanding of power electronic converters, inverter efficiency, and grid-tied component reliability, Understanding of power electronic converters, inverter efficiency, and grid-tied component reliability, Skills in physics-informed neural networks and predictive modeling for fault detection and energy forecasting, Experience with digital twin technology for simulation and analysis.

Students with backlog eligible: No

Selection Process

Resume Shortlist: Yes

Mode of Selection: Virtual

Resume shortlisting before test?: Yes

Test:	Yes
Mode of Test:	Online
Test duration (minutes):	60
Aptitude/Psycometric:	No
Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes
Technical Round:	Yes
HR Round:	No
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2027 (Second Year Students) - B.Tech / Dual, Graduating in 2027 (Third Year Students) - Dual Degree, Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Chemical Engineering, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, B.Tech and M.S.(R) in Electrical Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	35,000 INR Per Month
Accommodation:	Remote
Any other perks/ benefits/ components:	Work from home
Provision of PPO based on:	Yes

Provision of PPO based on test performance?

Tentative CTC for PPO select: 1,200,000 INR Per Annum

Medical Requirements

Medical Requirements: NA

Other Requirements

Other Requirements: participation in extracurriculars in the related fields such as hackathons, clubs, societies, events, and Olympiads. and exceptional enthusiastic engagement and leadership demonstrable in the interview is an additional plus point we are looking forward to.
