Type of Organization:	STARTUP
Nature of Business:	Core Engineering & Technology

Internship Profile

Job Title:	Software, Deep Learning, and Game Dev
Job Description:	At Smarttrak AI, we are pioneering the integration of advanced software solutions, deep learning algorithms, and interactive game development to deliver state-of-the-art AI-driven applications for the energy and manufacturing industries. We are seeking a versatile and innovative Software, Deep Learning, and Game Development Engineer to join our dynamic team. In this multifaceted role, you will develop sophisticated software systems, implement cutting-edge deep learning models, and create immersive simulations and visualizations that enhance our energy forecasting, fault prediction, and digital twin technologies

Key Responsibilities -

Design, develop, and maintain robust software applications tailored to our AI-driven solutions.

Implement scalable and efficient code using modern programming languages and frameworks.

Develop, train, and optimize deep learning models for applications such as energy forecasting, fault prediction, and anomaly detection.

Create interactive simulations and visualizations using game development platforms (e.g., Unity, Unreal Engine) to represent complex energy systems and industrial operations.

Ensure seamless integration of software, deep learning models, and simulation tools into our existing infrastructure.

Qualifications -

Bachelor's degree in Computer Science, Software Engineering, Artificial Intelligence, Game Development, or

Engineering, Artificial Intelligence, Game Development, or a related field. A Master's degree is preferred.
 Proficiency in programming languages such as Python, C++, C#, or JavaScript.
 Familiarity with data preprocessing, feature engineering, and model evaluation techniques.
 Experience with game development platforms (e.g., Unity, Unreal Engine) and creating interactive simulations.
 Knowledge of cloud platforms (e.g., AWS, Azure, Google Cloud) and deployment strategies for scalable applications.

Minimum No. of Hires: 1

Expected No. of Hires: 3

Location(s)/Place of Posting/Online: Remote

Skillset: To excel as a Software, Deep Learning, and Game Development Engineer at Smarttrak AI, the candidate should possess a bachelor's degree in Computer Science, Software Engineering, Artificial Intelligence, Game Development, or a related field; a master's degree is preferred. Key skills include proficiency in programming languages such as Python, C++, C#, or JavaScript, and experience with modern frameworks for scalable and efficient code development. The candidate should have a strong background in developing, training, and optimizing deep learning models for applications like energy forecasting, fault prediction, and anomaly detection, with familiarity in data preprocessing, feature engineering, and model evaluation techniques. Experience with game development platforms like Unity or Unreal Engine is essential for creating interactive simulations and visualizations of complex energy systems and industrial operations. Knowledge of cloud platforms such as AWS, Azure, or Google Cloud, and deployment strategies for scalable applications is important. The ability to seamlessly integrate software, deep learning models, and simulation tools into existing infrastructure, and to work collaboratively with cross-functional teams in a dynamic environment, is crucial.

Students with backlog eligible: No

Selection Process

Resume Shortlist: Yes

Mode of Selection: Virtual

Resume shortlisting before test?: Yes

Test: Yes

Mode of Test: Online

Test duration (minutes): 60

Aptitude/Psychometric: No

Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes
Technical Round:	Yes
HR Round:	No
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2027 (Third Year Students) - Dual Degree, Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Chemical Engineering, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, B.Tech and M.S.(R) in Electrical Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	35,000 INR Per Month
Accommodation:	Remote
Provision of PPO based on performance?	Yes
Tentative CTC for PPO select:	1,200,000 INR Per Annum

Medical Requirements

Medical Requirements:	NA
------------------------------	----

Other Requirements

Other Requirements:

participation in extracurriculars in the related fields such as hackathons, clubs, societies, events, and Olympiads. and exceptional enthusiastic engagement and leadership demonstrable in the interview is an additional plus point we are looking forward to.
