Type of Organization:	STARTUP
Nature of Business:	Core Engineering & Technology

Internship Profile

Job Title:	Structural & Mechanical Design Engineer
Job Description:	As a Structural and mechanical design engineer your responsibility will be to develop in-house hardware components like the tracker rails and other infrastructure surrounding the deployment of a large solar energy project. The main focus here is the efficiency and cost effectiveness, without compromising in the quality. Your workflow also comprises of simulation and prototype testing of the product. In this role, you will design and develop robust mechanical and structural components that integrate seamlessly with our advanced AI technologies, including energy forecasting, fault prediction, and digital twin systems Key Responsibilities - Create detailed mechanical and structural designs using CAD software to support AI-driven solutions for solar power plants and industrial operations. Develop prototypes and conduct rigorous testing to validate designs, ensuring reliability and performance in real-world applications Work closely with Electrical & Embedded Systems Engineers, data scientists, and other cross-functional teams to integrate mechanical designs with electronic and software components like digital twins Maintain comprehensive documentation of design processes, specifications, and modifications to facilitate effective communication and project continuity Ensure all designs comply with industry standards, safety regulations, and best practices for quality and reliability Qualifications -

Bachelor's degree in mechanical engineering. Structural

Bachelor's degree in Mechanical Engineering, Structural Engineering, or a related field. A master's degree is a plus
 Interest or experience in renewable energy, hardware manufacturing, or IoT products is advantageous
 Proven experience with CAD software such as SolidWorks, AutoCAD, or similar tools
 Strong understanding of mechanical principles, materials science, and structural analysis
 Detail-oriented with strong organizational capabilities
 Ability to work both independently and as part of a team in a fast-paced environment

Minimum No. of Hires: 1

Expected No. of Hires: 3

Location(s)/Place of Posting/Online: Remote

Skillset: To excel as a Structural and Mechanical Design Engineer in this role, the candidate should hold a bachelor's degree in Mechanical Engineering, Structural Engineering, or a related field; a master's degree is a plus. Key skills include proven experience with CAD software such as SolidWorks or AutoCAD, and a strong understanding of mechanical principles, materials science, and structural analysis. The candidate should have experience in developing hardware components for large-scale solar energy projects, emphasizing efficiency and cost-effectiveness without compromising quality. Proficiency in simulation and prototype testing is essential to validate designs in real-world applications. The ability to design and develop robust mechanical and structural components that integrate seamlessly with advanced AI technologies—like energy forecasting, fault prediction, and digital twin systems—is crucial. They must be adept at collaborating with cross-functional teams, including Electrical and Embedded Systems Engineers and data scientists, to integrate mechanical designs with electronic and software components. Attention to detail, strong organizational skills, and the ability to maintain comprehensive documentation are important. A strong interest or experience in renewable energy, hardware manufacturing, or IoT products is advantageous, along with the ability to work both independently and collaboratively in a fast-paced environment.

Students with backlog eligible: No

Selection Process

Resume Shortlist: Yes

Mode of Selection: Virtual

Resume shortlisting before test?: Yes

Test: Yes

Mode of Test: Online

Test duration (minutes):	60
Aptitude/Psycometric:	No
Technical:	Yes
Group Discussion:	No
Personal Interview:	Yes
Technical Round:	Yes
HR Round:	No
Other Processes (if any):	
No. of Rounds:	2
Medical Test:	No

Eligible Academic Programs

Diversity Recruiting:	No
Eligible Years:	Graduating in 2027 (Third Year Students) - Dual Degree, Graduating in 2026 (Pre-Final Year Students) - B.Tech / Dual / Master's
Eligible Departments:	B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Chemical Engineering, B.Tech in Civil Engineering, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Energy Engineering, B.Tech in Engineering Physics, B.Tech in Engineering and Computational Mechanics, B.Tech in Materials Engineering, B.Tech in Mathematics & Computing, B.Tech in Mechanical Engineering, B.Tech in Production & Industrial Engineering, B.Tech in Textile Engineering, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Chemical Engineering, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, B.Tech and M.S.(R) in Electrical Engineering

Stipend Details

Stipend (per month) (In INR Per Month):	35,000 INR Per Month
Provision of PPO based on performance?	Yes
Tentative CTC for PPO select:	1,200,000 INR Per Annum

Medical Requirements

Medical Requirements:

NA

Other Requirements

Other Requirements:

participation in extracurriculars in the related fields such as hackathons, clubs, societies, events, and Olympiads. and exceptional enthusiastic engagement and leadership demonstrable in the interview is an additional plus point we are looking forward to.
